

Videomate C200 USB A/V Capture Stick Start Up Guide

Videomate C200 is an USB 2.0 interface analog video/audio input and capture device that can input and directly convert analog video/audio from your DV camcorder, V8, VHS tapes, DVD recorder, VCD Players, and camera to digital formats. Easily plugs into USB port on PC or laptop, the Compro Videomate C200 imports all your TV recordings, home video recordings, favorite videotapes and any other video/audio collections into your hard disk.

The bundled Ulead VideoStudio 11 SE and Ulead DVD MovieFactory 5.5 SE software let you create your own movies, and then you can burn it to VCD/DVD to share with your friends. About the use of bundled software, please refer to the Ulead software on-line help for more details.

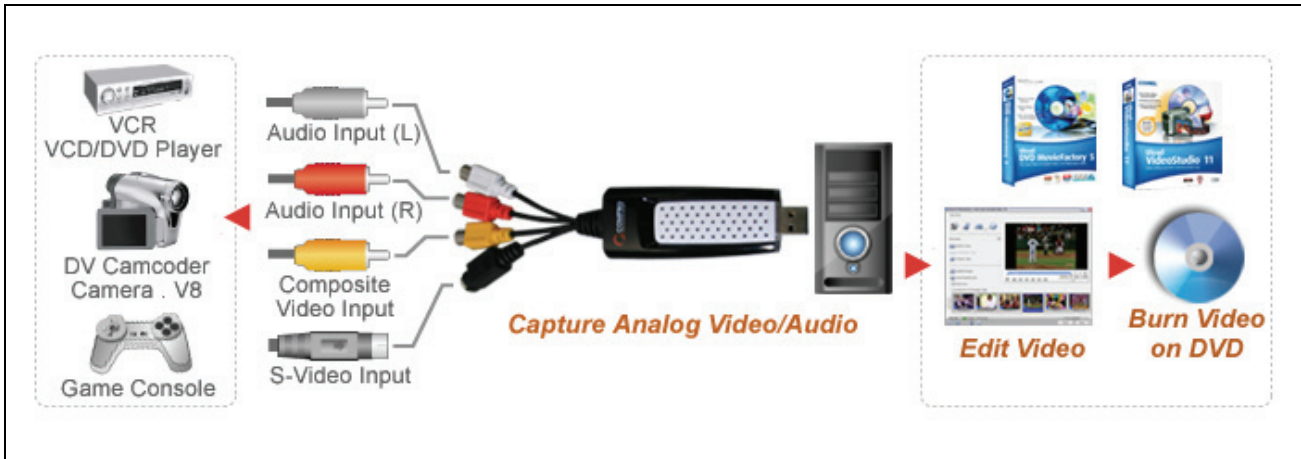

System Requirements

- CPU: P4 1.8 GHz or above
- Graphics card supports DirectDraw and DirectX 9.0
- Sound card or on-board sound chip
- Memory : 512 MB or 1GB depending on the system configuration
- CD-ROM for install software
- Windows XP SP2, Vista x86/x64

Software Installation

- Step 1. Start the computer. Insert the installation CD into your CD drive.
- Step 2. After starting, Windows will detect a new device and start the Add/Remove Hardware Wizard. Please press **Cancel** and go to the next step.
- Step 3. If you have Autorun enabled, the installer will start automatically.
(If Autorun is disabled, double-click on "setup.exe" on the installation CD.)
- Step 4. After each program is successfully installed, press **Finish** to proceed.
- Step 5. When installation completes, press **Finish** to restart computer.
- Step 6. After install the C200 driver, you can install the Ulead software as you need.
