

1. Select the setup button on the main page from your Internet Explorer.

2. Once you are in the setup panel, please choose "Maintenance".

3. Under maintenance, you will see a "maintenance" tab on the left hand side tab, please click on that.

4. Please download the latest firmware from [website](#), which is a bin file. Then, please direct the target to "ip50WImage_IPCAM_Ver1.xx.bin" and follow the onscreen instruction.
